

SYSTEMAT

a passion for solutions

Total solution or clear-cut services?

Systemat takes up your challenge –
with an unceasing passion for excellence.

Are you looking for ...

i

... a business partner that handles your entire IT infrastructure? Or are you on the look-out for a systems specialist who can ensure a successful conclusion to a specific IT-related job, no matter how big it is? Whatever your IT requirements, Systemat will easily see to them. By drawing on our deep knowledge and experience, we relieve you of your IT burden. So you can focus solely on your core competences.

SYSTEMAT

In other words: Systemat supports the ongoing development of your business. By delivering top-notch solutions, day after day. By anticipating and catering for your medium- and long-term needs. By assessing the impact of new technologies on your turnover as quickly and as accurately as possible.

Since Systemat is a large, independent group, we are able to adjust flexibly to the needs of both small and medium-sized businesses (SMBs) as well as bigger concerns and organizations. The quality of our services, our financial strength and our personal approach, they all inspire an unshakeable trust in what we do. No matter how extensive the assignment is, or how specialist our technological solutions are, Systemat always has a human face. So you can look us straight in the eye, each and every time we meet.

SYSTEMAT
global solutions

Focus on what really matters in your SMB.

For your company, an IT infrastructure that works swiftly and hassle-free is crucial. But do you have enough internal resources at your disposal? In any case, you will need a safety net. Let Systemat Global Solutions take care of your entire IT system and concentrate on your core activities instead.

Count on a business partner who is just around the corner.

We will guide all stages of your IT-development: from analyzing your business needs to optimizing your IT resources. We offer a complete package of hardware, software and services that will suit your company down to the ground. Because Systemat understands small and medium-sized businesses better than anyone.

As befits a loyal and trusted partner, we are ready to serve you at all times. Systemat readily adapts to your personal agenda and to the operations of your SMB. There will be one single point of contact, who is only a mouse click or a phone call away from your office. He or she needs just a minimum of information to size up your problem and to solve it immediately, in close consultation with a team of trained professionals.

Safely leave everything to us. That's right: everything!

Systemat offers a complete suite of services, so we take the entire IT burden off your hands. After an exploratory talk and an in-depth analysis of the problem or need, we will suggest what we could do in your specific case. Nothing more, nothing less. We come up with an expressly tailored end-to-end solution, comprising unparalleled, groundbreaking technology in the fields of networking, security, storage, backup and restore, messaging systems, printing management, cabling, hosting, web design, and much, much more.

Once the hardware and programs have been installed, we support the use thereof with a permanent help desk. No matter how small the problem or how minor the hitch, we will help you, either remotely or on-site. Our support formulas *Global-IT* and *CreditPack* are flexible and efficient.

Finally, Systemat offers a wide range of ERP solutions perfectly adapted to SMBs: *Popsy*, *Ypsos* and *Dimasys*. In other words: Systemat provides you with all-compassing solutions on a human scale. All at a fair price for SMBs. Complementary, we will even propose a financial solution for your IT, on very favourable terms.

SYSTEMAT
business services

Specialist personnel, tailor-made to further your corporate goals.

You are very demanding, both on your employees and on yourself; otherwise you would never have been able to grow the impressive business or organisation you are currently at the head of. Well, you are right to demand the same high level of quality when you decide to team up with Systemat Business Services. Both for the technological platform and infrastructure we offer you and for the know-how of our staff.

What you need to know about our expertise.

Systemat gives advice, installs, manages and looks ahead. In close consultation with you, we will choose the most appropriate platform (Wintel, Unix, OS/400) for your specific application. We will upgrade your existing mail system and/or computer networks. We will bring your migration projects to a satisfactory conclusion and we will search for innovating and effective concepts, such as *server consolidation*, *virtual server* or *server-based computing*. In addition, we will also manage your data storage through professional applications and tested procedures.

We make sure your business stays up and running.

Information is only valuable if it is available at all times. Systemat proposes a number of services to help you to safely and effectively store and save data. Our exceptionally efficient contingency scenario allows your company to always continue operating, even in case of a system crash. To recover your data we deploy the best people, devices and programs. And we provide you with the necessary office space to carry on with your essential activities under the best possible circumstances.

Only the best-qualified experts will do ...

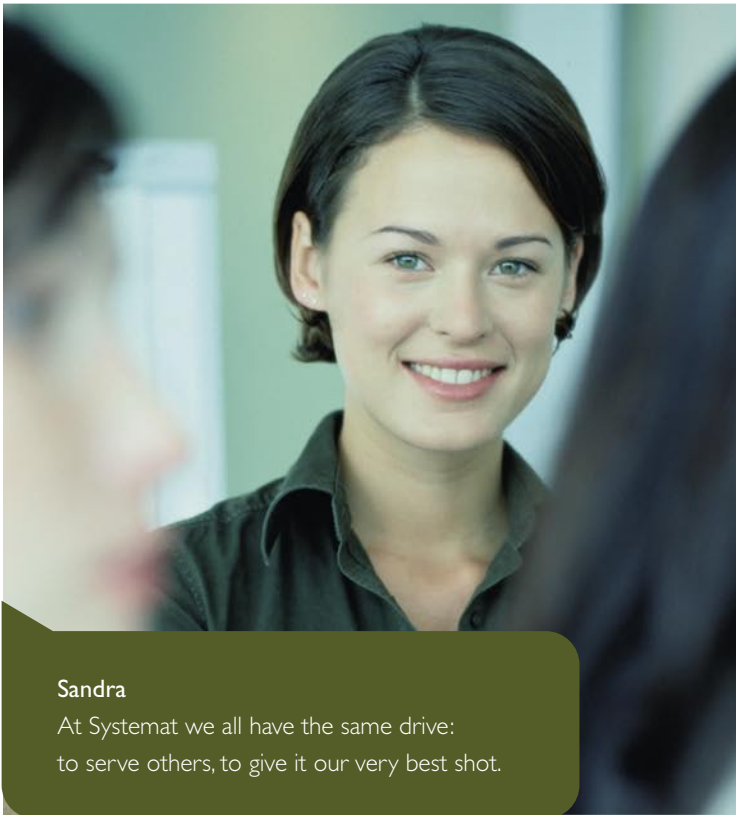

Systemat brings the experience, knowledge and motivation of reputed specialists to your company, so that all your objectives in the fields of performance, productivity or budgets become achievable. In this way, you will be able to upgrade your IT infrastructure from a costly, cumbersome machine into a sound, strategic tool.

Tried and tested quality, proven beforehand.

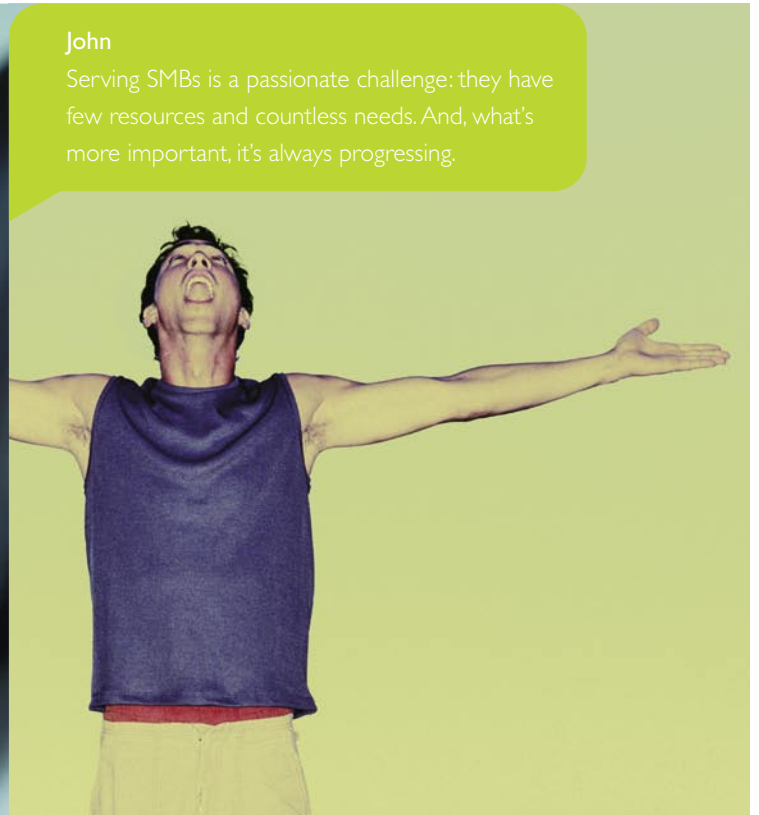

In its state-of-the-art laboratories, located in Belgium, Luxembourg, France and Portugal, Systemat subjects the latest IT equipment to the most rigorous testing. Every device your employees use will therefore be thoroughly analyzed, configured and integrated beforehand. The same infrastructures also serve as logistic centres for the preparation and coordination of major projects, such as roll-outs or Private PC plans.

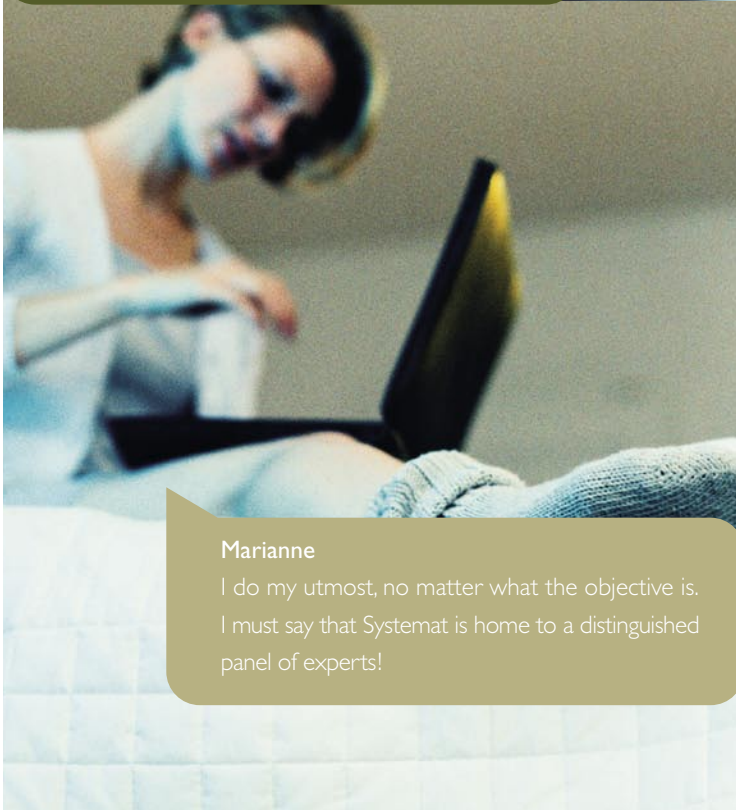

Sandra

At Systemat we all have the same drive: to serve others, to give it our very best shot.

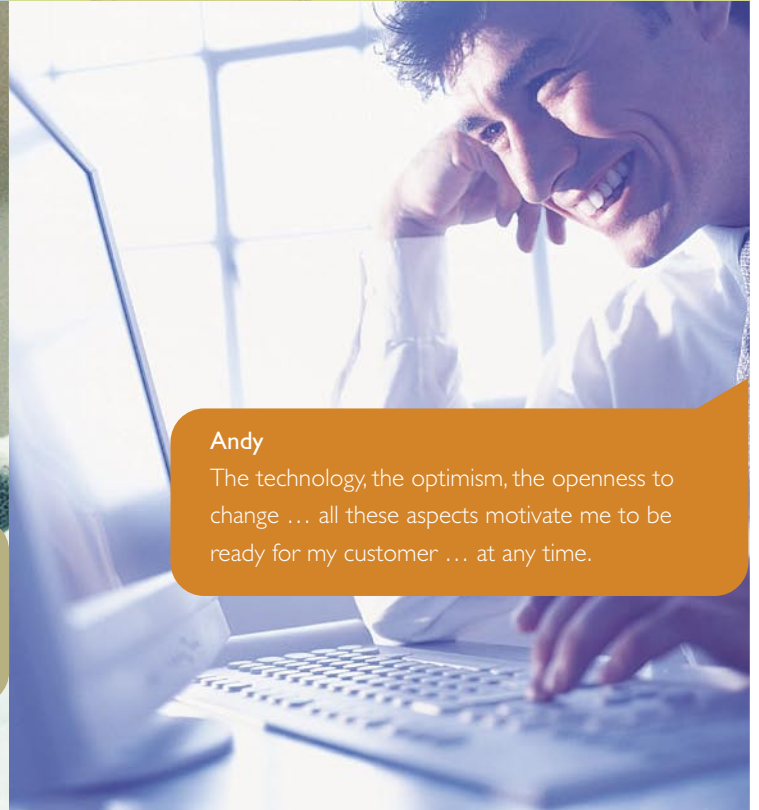

John

Serving SMBs is a passionate challenge: they have few resources and countless needs. And, what's more important, it's always progressing.

Marianne

I do my utmost, no matter what the objective is. I must say that Systemat is home to a distinguished panel of experts!

Andy

The technology, the optimism, the openness to change ... all these aspects motivate me to be ready for my customer ... at any time.
